

# Mohamed Asan

Frontend WebDeveloper|ComputerScienceEngineeringStudent|Prompt Engineer  
mohamedasan357@gmail.com |linkedin.com/in/mohamed-asan07/| github.com/mohamedasan07 | Chennai, Tamil Nadu

## PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student and Frontend Web Developer with hands-on experience building responsive, user-centric web applications using HTML5, CSS3, JavaScript, and Vue.js. Skilled in leveraging modern AI and prompt engineering techniques to accelerate development workflows and deliver intelligent, high-performance digital solutions. Experienced in blockchain fundamentals, having designed and deployed ChronosGuard — a blockchain-based intellectual property protection system that secured SecondPrize at a National Level Hackathon. Adept at UI/UX design, version control with Git/GitHub, and translating complex requirements into clean, maintainable code. Actively seeking internship opportunities to contribute to innovative teams and grow as a well-rounded software developer.

## TECHNICAL SKILLS

Programming Languages: HTML5, CSS3, JavaScript  
Web Technologies: Vue.js, Responsive Web Design, WordPress  
Tools & Platforms: Git, GitHub, VS Code, Canva  
Other Skills: Prompt Engineering, UI/UX Design, Blockchain Fundamentals

## PROJECTS

ChronosGuard – Blockchain-based Intellectual Property Protection SystemNational Level Hackathon | 2nd Prize  
Adecentralized application built to protect digital creative works through blockchain-based ownership verification and cryptographic timestamping. The platform enables creators to register and authenticate their IP rights — eliminating unauthorized duplication and simplifying copyright disputes — with a responsive, intuitive frontend optimized for seamless cross-device experience.

- Architected a blockchain ownership verification module that cryptographically timestamps and secures digital creative assets against unauthorized reproduction.
- Designed and implemented a fully responsive frontend using HTML5, CSS3, and JavaScript, ensuring cross-device compatibility and accessibility.
- Integrated smart-contract-driven registration workflows enabling creators to assert and verify copyright ownership in real time without intermediaries.
- Solved a critical real-world IP protection problem, earning Second Prize at a National Level Hackathon through innovation, design, and end-to-end execution.

## EDUCATION

BachelorofEngineering–ComputerScienceandEngineering 2024 – 2028 (Pursuing)  
Mohamed Sathak A.J.College of Engineering, Tamil Nadu

## ACHIEVEMENTS

- Secured Second Prize at a National Level Hackathon for Chronos Guard, competing against teams from institutions across India.
- Independently designed, built, and deployed Chronos Guard — a fully functional decentralized application solving real-world digital copyright challenges.
- Developed and launched a professional developer portfolio (mohamed-asan.netlify.app) showcasing end-to-end project ownership and technical expertise.
